Series

Grand Theatre Components

The new reference for home cinema sound

The Grand Theatre Components from ADAM Audio now for the first time offers the high precision sound found in professional studios for your home theatre.

The GTC Series consists of four components that can be individually combined. Each component incorporates ADAM's own transducer technology, the X-ART tweeter, and high-grade midwoofers. The two bigger speakers have integrated segments on which the drivers are mounted. These segments can be twisted by 90 degrees so that the speakers can function both in a horizontal and vertical setup. In addition this feature allows the easy and efficient adjustment of the tweeter according to the position of the audience.

„These speakers delighted us with their incredible ease at any volume level, the delicate high end delivered by the air-motion ribbon tweeter, its spectacular imaging, and its lifelike timbre with percussion instruments. (...) 11 on a 10 scale for sound.“
Michael Fremer, Home Theater

GTC55

The smallest member of this series already contains the sound and acoustics of its bigger siblings. Equipped with ADAM's own X-ART tweeter and two midwoofers it can reproduce the finest nuances of musical detail.

Basic technical data at a glance:

- X-ART tweeter
- 2 x 5.5" midwoofers
- Frequency response: 45Hz - 50kHz
- Efficiency: 86dB/W/m
- Power handling: 120W/180W (rms/music)
- Input impedance: 8Ω
- Max peak: 114dB
- Weight: 11.2kg
- Dimensions H x W x D (mm): 505 x 206 x 316

GTC77

The middle sized speaker of this series incorporates, in addition to the X-ART tweeter, two bigger (7") subwoofers and an additional midwoofer, that will give the mid-frequencies which are essential for any musical experience, that additional vividness typical for ADAM speakers.

Basic technical data at a glance:

- X-ART tweeter
- 4" midwoofers
- 2 x 7" subwoofers
- Frequency response: 38Hz - 50kHz
- Efficiency: 88dB/W/m
- Power handling: 150W/230W (rms/music)
- Input impedance: 4Ω
- Max peak: 118dB
- Weight: 20.6kg
- Dimensions H x W x D (mm): 810 x 260 x 317

GTC88

The largest member of the GTC Series offers the one of a kind sound reproduction of this series at an even higher level. Wherever perfect and powerful sound is needed, the GTC88 will be the ideal choice.

Basic technical data at a glance:

- X-ART tweeter
- 5.5" midwoofer
- 2 x 8.5" subwoofers
- Frequency response: 34Hz - 50kHz
- Efficiency: 90dB/W/m
- Power handling: 180W/260W (rms/music)
- Input impedance: 4Ω
- Max peak: 124dB
- Weight: 27.5kg
- Dimensions H x W x D (mm): 997 x 300 x 317

GTC Sub

For any multi channel system that wants to offer authentic and impressive lows, the Sub in combination with GTC speakers will be the perfect pair. The 12" subwoofer can reproduce the lowest frequencies with perfect precision and accuracy.

Basic technical data at a glance:

- 12" subwoofer
- Frequency response: 22Hz - 150Hz
- Built in amplifier with 200W/300W (rms/music)
- Numerous controls for sound adjustment
- Max peak: 115dB
- Weight: 25.8kg
- Dimensions H x W x D (mm): 560 x 480 x 317
