

Magazine Tests

A7

The fact is, on the ADAM A7 - the smallest active monitor - the detail level, amazing width and depth of sound stage are unattainable for most concurrent speakers. Planning space in your mix with A7 gives much fun and can be very creative - you have the total control over the sound scapes. I put my name under the words: "A7 are the best monitors on the market in this price range. They are ideal solution for small project or home recording Studios."
